While we time and again emphasize on the natural development of young kids, still we don't miss a trick to intrude with their growth. And the latest example is the "Ritmo" by [Nuvo](#) which actually is an advanced sound system that lets the ambitious patents enforce their musical interests on their unborn baby. Poor soul! Connecting to iPod, BlackBerry, iPhone and a variety of MP3 players, the prenatal music player straps four tummy-firing speakers around an expectant mother's belly to commence the woes of the baby in the womb. The "Advanced Pregnancy Sound System" is available for \$130. Check out the video after the jump.
