Baby in the Womb Using an iPhone and the Ritmo Advanced Pregnancy Sound System

ON JANUARY - 13 - 2010

Today Nuvo Group USA announced the release of the Ritmo Advanced Pregnancy Sound System, which delivers safe high quality sound to prenatal listeners. Ritmo was created to provide a convenient, comfortable and safe way for families to share the sensory and emotional experience of bonding through sound and music with their developing baby. Ritmo can connect to most audio devices with a universal stereo plug such as iPods, MP3 players, iPhones and Blackberries.

As an expecting parent I can see the usability of this product, although I think \$129.99 is a bit pricey for the unit. But I guess it beats sticking your ear buds you know where. Parents looking for the RiTmo can find it here at nuvo-group.com.
